

The maturity levels

The Value Chain

Why choose the CMMI?

- **Activities analysis**
 - Delete waste
 - Identify activities that generate value
- **Staged process**
 - Complete overview of the process
 - ▶ Delete overlapping activities and inefficiencies
- **Optimization of the process** ⇒ better efficacy and efficiency
- **Shared overview of the process**
 - The *modus operandi* is well known to all

Adoption of the CMMI

Level 1	Level 2	Level 3	Level 4	Level 5
•Processes partially defined	•Activities development based on best practice	•Documentation, definition and control of processes	•Adherence to style guide and to quality metrics •Measurement of the customer satisfaction	•Defects prevention and resolution of problems
•Complete execution of the project •Generic goals of the project	•Execution of the planning-based process	•Management and control of processes	•Automation of the process •Implementation of quality standards	•Innovation training •a goal-oriented strategy

Thank you!
